Summary

Software Developer with 2+ years of experience building enterprise web applications using C#, ASP.NET Core, Angular, Web APIs and Oracle. Skilled in REST APIs, Object-Oriented Programming, SQL optimization and secure application development. Passionate about learning Azure, AI-assisted development and modern software engineering practices.

Experience

Secure Meters Limited

Software Developer

Jul 2024 – Present

Udaipur, Rajasthan

- Developed and maintained 4+ enterprise web applications using ASP.NET Core, Angular, C#, Oracle Database and REST APIs.
- Built 15+ Oracle PL/SQL stored procedures and packages, automating business workflows and improving reporting efficiency.
- Implemented Role-Based Access Control (RBAC) across enterprise applications supporting 500+ users.
- Optimized application performance through AJAX-based asynchronous loading and SQL query optimization.
- Collaborated with cross-functional teams throughout SDLC including development, testing, deployment and production support.

Secure Meters Limited

Last Semester Trainee – Full Stack Developer

Jan 2024 – Jun 2024

Udaipur, Rajasthan

- Developed production-ready features using Angular, ASP.NET Web API, C# and Oracle SQL while contributing to enterprise manufacturing applications.
- Participated in debugging, testing, feature enhancement and deployment activities following software engineering best practices.
- Collaborated with senior developers to understand enterprise application architecture, coding standards and database optimization techniques.

Projects

Operator Tracking System (OTS) | ASP.NET Core 10, DevExpress, Bootstrap 5, Chart.js, Oracle

- Organization-wide manpower tracking platform deployed across all manufacturing units, monitoring 1,000+ operators across production lines in real time.
- Consolidated 6 modules attendance, leave, gate pass, holiday management, line performance and operator behavior into a single unified platform, replacing fragmented manual processes.
- Delivered 5+ interactive dashboards using DevExpress and Chart.js, enabling supervisors to cut bottleneck identification time and drive measurable line efficiency improvements.
- Designed modular RBAC architecture supporting 3 distinct role tiers: operators, supervisors and management.

Online TC Portal | Angular 20, ASP.NET Core Web API, Oracle, Pentaho Kettle

- Developed a centralized Test Certificate portal covering 90%+ of manufactured products across multiple sites.
- Built REST APIs and Angular modules enabling self-service certificate downloads for customers.
- Migrated distributed databases into a centralized Oracle database using Pentaho ETL.
- Received the Merit Award for modernization of the enterprise TC Portal.

Shift Performance System | ASP.NET MVC, Crystal Reports, Oracle PL/SQL

- Built a manufacturing line analytics system from scratch; automated weekly performance reports that previously required 3+ hours of manual effort per cycle.
- Developed 10+ Crystal Reports backed by complex PL/SQL procedures for multi-dimensional workforce and line efficiency analysis across production shifts.

Technical Skills

Languages: C#, JavaScript, TypeScript, SQL, PL/SQL, HTML5, CSS3

Frontend: Angular 20, Bootstrap 5, jQuery, AJAX, DataTables, Chart.js, DevExpress

Backend: ASP.NET Core MVC, ASP.NET MVC, .NET 10, Web API, REST APIs

Database: Oracle SQL, PL/SQL, Stored Procedures, Packages, Query Optimization

Tools: Visual Studio, VS Code, Git, Postman, Pentaho Kettle, Crystal Reports, Toad for Oracle

Education

Modu University of Science and Technology

B.Tech in Computer Science (CGPA: 9.37 / 10)

2020 – 2024

Rajasthan, India

Achievements & Certifications

- **Merit Award** — Secure Meters Limited, for TC Portal modernization covering 90%+ of manufactured products across all sites.
- **3rd Place** — Website Design Hackathon; built a fully functional fundraising website within 24 hours.
- Completed **Barclays Mentorship Program** focused on software engineering best practices and professional development.
